

FOR IMMEDIATE RELEASE

ROCKI PLAY App Now Available for iOS

Stream music to any speaker effortlessly from any iOS device with free ROCKI app

NEW YORK – (July 8, 2014) – ROCKI, the creators of the universal solution to stream music to any speaker system, is officially launching a free app for iOS users. The iOS app, available for iPhone and iPad, allows users to easily and effortlessly stream music to any speaker system transforming it to a wireless speaker system.

ROCKI Play is a portable WiFi enabled plug-in that quickly transforms any speaker, with an audio input, to a wireless speaker system. Using WiFi, ROCKI receives audio from smartphones, tablets or PCs, at a greater distance than Bluetooth technology - through walls, and at better audio quality more suitable for music. The free downloadable ROCKI app, currently available for iPhone and Android, allows users to access their saved music in their phones and local home network and access multiple devices' shared music creating socially curated playlists with a Jukebox feel. The ROCKI app also supports multiple users playing music to multiple speakers in many rooms at the same time or different tunes in different rooms.

Using the ROCKI iOS App is optional as ROCKI PLAY is also compatible with Airplay streaming technology that is built into every iOS and MacOS device.

“ROCKI’s mission is to create a universal system to bridge music fans with their music anywhere; in the home, in the car, beach or park,” says Nick Yap, CEO of ROCKI. “By launching the iOS ROCKI app, we are now able to fulfill the needs of both Android and iPhone users allowing most Smartphone users to free their music.”

ROCKI Play is available for order at www.myrocki.com and amazon.com for \$49.
